# COMMERCIAL range

**polytec**'s Commerical range comes in a variety of colours, thicknesses and sheet sizes specifically designed for commercial application. Our range of colours are available in Melamine, Laminate and Compact laminate making it easy for you to choose the design features you are looking for. Choosing **polytec**'s Commercial colours and materials for today's working environments will give your design concept a fresh and unique look.

The **polytec** Commercial range will inspire unlimited design possibilities for any commercial environment.

In addition to the Commercial range, is the introduction of the new Woodmatt finish in versatile, larger decorative boards, all with matching laminate, and a selection of Compact laminates. The Woodmatt finish from **polytec** offers a subtle woodgrain embossing with an overall matt surface, combining the best of natural timber with technology advancements to match perceptions of authentic timber veneer – in look, feel and warmth.

Inherent with our typical durable properties and the **polytec** value price point, the unique Woodmatt colours and finish, help you to create a natural looking and feeling environment, now available in 13mm Compact laminate for the most hard working environments.

## ENVIRONMENT & SUSTAINABILITY

**polytec** is 100% Australian family-owned brand and for over 30 years, we have taken pride in being an Australian manufacturer, with sustainability ingrained in the core of our operations, products, and work practices, shifting towards continual dedication to improving and enhancing our environmental performance. This involves a steadfast reduction of our carbon footprint, minimising waste, optimising energy efficiency, and integrating ethically sourced materials into our product ranges.

Our MDF and Particleboard are manufactured from managed and renewable plantation pine that has been Green Tag, Responsible Wood and PEFC certified. All **polytec** board products are manufactured from E0 or E1 substrates, with particleboard now made from a percentage of recycled wood material.

The reDirect Recycling Wood Recovery Initiative services **polytec** customers by collecting raw and melamine coated particleboard offcuts for reuse. These materials are diverted from landfill and repurposed into new particleboard within our closed loop manufacturing processes, reducing waste and preserving valuable plantation resources.

**polytec** are striving to reduce carbon emissions by installing solar panels throughout all sites nationwide. Since 2018 over 46,000 solar panels across the network of facilities have been installed. When installed, the Oberon facility was Australia's largest rooftop solar system with over 27,000 solar panels over eight hectares.

**polytec** is on a journey – one that places sustainability at the centre of how we design, manufacture, and support our customers. We believe that sustainable practices are the foundation of strong, resilient communities – and we're committed to contributing to a healthier, more sustainable future for all.

## CARE & MAINTENANCE

**polytec** do not recommend the use of Melamine, Laminate, and Compact laminate products in a sliding or non-fixed application (hinged) unless the use of a mechanical stabilising system is fitted.

Your **polytec** doors and panels are made from a Moisture Resistant Medium Density Fibreboard (MR MDF), but as with many wood based panels, they are not waterproof. Care should be taken to wipe up spills immediately, ensuring the doors are not exposed to high or continuous levels of moisture, steam and humidity.

The surface of **polytec**'s Compact laminate is made from a stain-resistant melamine based resin. The toughness and high impermeability of this surface means that **polytec**'s Compact laminate should require no more than wiping with a soft cloth, dampened with plain water or a household detergent mix to remove all common spills. For more stubborn stains use a mild household cleaning spray. Always ensure you refer to the recommendations provided by the manufacturer of the cleaning product before use.

By following these simple steps you should retain a beautiful surface for many years.

Visit [www.polytec.com.au](http://www.polytec.com.au) for specific care and cleaning information.

## IMPORTANT

Darker colours will show superficial wear and tear more readily than lighter coloured surfaces and require more care and maintenance.

The colours and details shown in this brochure are to the highest standards in printing. However, they should only be used as an indication of actual product colour. To order your free colour sample visit [www.polytec.com.au](http://www.polytec.com.au).

**polytec** swatches and samples represent a small area of the overall colour structure, to view a large colour sample or a full sheet design, visit [www.polytec.com.au](http://www.polytec.com.au).

The use of our current samples gives the colour and finish that a customer would expect to receive. Samples are provided for colour and finish selection and **polytec** recommend testing a sample for fingerprint resistance and ease of cleaning. **polytec** does not guarantee exact colour matches across product ranges due to colour variation in each product group.
